JOHN MICAH MERCADO

IT Specialist | Systems, Networking & Technical Support
Jacksonville, FL • 954.534.1590 • mikkomercado97@gmail.com • linkedin.com

PROFESSIONAL SUMMARY

Versatile IT professional with CompTIA A+, Network+, Server+, Security+, and CySA+ certifications and a B.S. in Information Technology. Skilled in troubleshooting, systems administration, network analysis, and technical documentation, with hands-on experience across Linux, TCP/IP networking, databases, and software development. Four years of U.S. Army technical maintenance experience diagnosing complex failures, leading teams, and keeping critical equipment mission-ready. Seeking an IT Specialist, help desk, systems support, or network support role.

CERTIFICATIONS

CompTIA A+ 09/2026
CompTIA Network+ 09/2026
CompTIA Server+ 09/2026
CompTIA Security+ 12/2024
CompTIA CySA+ 10/2026

TECHNICAL SKILLS

- **Systems & Support:** Troubleshooting & Root-Cause Analysis, Systems Administration, Linux, Cloud Computing, Technical Documentation
- **Networking:** TCP/IP, LAN, Network Troubleshooting, Packet Analysis (Wireshark)
- **Security:** Vulnerability Assessment, Intrusion Detection, Digital Forensics, Session Security, Secure Coding, WAF
- **Scripting & Development:** Python, Java, Kotlin, C#, JavaScript, TypeScript, SQL, HTML/CSS; React, Express, SQLite3; Git, GitHub
- **Automation & AI:** AI-Assisted Development (Cursor, Antigravity), Generative AI (Gemini), Prompt Engineering

PROFESSIONAL EXPERIENCE

AI Integration Specialist (Internship) | IPMD, Inc., Remote, San Mateo, CA *07/2026 – 10/2026*

- Evaluated multiple AI platforms (Cursor, Antigravity, Gemini) and built prompts and workflows to automate tasks and streamline content production.
- Designed, built, and launched a functional website during onboarding using AI-assisted development tools.
- Applied iterative testing and quality review to improve the accuracy and consistency of AI-generated output.

Wheeled Vehicle Mechanic | U.S. Army, Fort Bragg, NC *08/2018 – 09/2022*

- Diagnosed and repaired complex mechanical, electrical, powertrain, and fuel-system failures using systematic fault isolation and root-cause analysis.
- Led teams of mechanics on special missions in austere environments, coordinating diagnostics, repairs, and recovery under strict deadlines.
- Performed preventive maintenance checks and services (PMCS) to catch potential failures early and protect operational readiness.
- Followed technical manuals and procedures and collaborated with cross-functional teams to identify failures and implement corrective actions.
- Maintained strict compliance with safety, hazardous-material, and risk-mitigation protocols.

PROJECTS

Security Testing & Remediation Labs | Personal *June 2024 – December 2025*

- Used Wireshark to analyze HTTP/HTTPS traffic and demonstrate session replay and hijacking, then secured sessions with encryption, secure flags, rotation, and expiration policies.
- Tested SQL injection on vulnerable environments and remediated with parameterized queries, input validation, and WAF rules; ran Python reverse-TCP exercises in controlled labs.

Web, Mobile & Data Projects | Personal *March 2026 – July 2026*

- Built a full-stack app (Express, React, TypeScript, SQLite3), an Android financial calculator (Java/Kotlin, Jetpack Compose), and a portfolio site on GitHub Pages.
- Developed a C# customer churn pipeline that parses and validates CSV data to flag high-risk accounts.

EDUCATION & TECHNICAL TRAINING

Bachelor of Science in Information Technology | University of North Florida, Jacksonville, FL *07/2026*
Coursework: Computer Networks, Systems Administration, Cloud Computing, Cybersecurity Systems, Computer Programming, IT Project Management

CompTIA Career Development Program (A+, Network+, Server+, Security+, CySA+) | Star V Learning Centers *08/2026 – 10/2026*
